Casablanca

## PROFESSIONAL SUMMARY

Engineering Lead with **8+ years** of experience building and scaling web, data, and AI-powered products across consulting and startup environments. Led platform delivery for enterprise clients at **BCG** and later co-founded and scaled a digital and GenAI startup. Strong track record in engineering leadership, solution architecture, team mentoring, stakeholder management, and delivering high-impact products aligned with business goals.

## EDUCATION

### Institut National des Postes et Télécommunications (INPT)

M.Eng. in Software Engineering — Web, Mobile & Intelligent Systems  
2016 – 2019

### Preparatory Classes for Engineering Schools

Industrial Sciences, Physics & Mathematics  
2014–2016

## CORE SKILLS

- Leadership & Management: Technical mentorship, architecture reviews, stakeholder management, cross-team collaboration, Agile/Scrum delivery
- Languages: TypeScript, Python, Go, Elixir, JavaScript
- Backend & APIs: Node.js, FastAPI, Django, GraphQL, REST APIs
- Frontend: React, Next.js, Material UI, Tailwind CSS
- Architecture: Microservices, event-driven systems, domain-driven design (DDD), API gateway design
- Cloud & DevOps: AWS, GCP, Azure, Docker, Kubernetes, GitHub Actions, CI/CD
- Data & AI: PostgreSQL, MongoDB, Redis, Elasticsearch, TensorFlow.js, LLM integration
- Testing & Quality: Jest, PyTest, Cypress, continuous testing
- Collaboration Tools: Git, Jira, Slack, Confluence, Notion

## LANGUAGES

- English: Full Professional Proficiency
- French: Full Professional Proficiency
- Arabic: Native / Full Professional Proficiency

## PROFESSIONAL EXPERIENCE

### Co-Founder & CTO

Weblanca | February 2025 – Present | Casablanca, Morocco

- Co-founded a tech startup delivering custom digital and GenAI-powered solutions for clients across diverse industries.
- Integrated Generative AI workflows into client products, enhancing automation, content generation, and data intelligence.
- Drove product roadmap and translated business and client needs into maintainable, high-performance technical solutions.
- Built and guided a small, high-impact engineering team; established Agile workflows and code review standards.

### Senior Software engineer then Engineering lead

Boston Consulting Group | April 2021 – August 2023

- Led the delivery of full-stack data platforms and digital products for enterprise clients across multiple industries.
- Designed GraphQL APIs and data pipelines, improving data retrieval performance by 40%.
- Partnered with cross-functional teams on architecture decisions, cloud deployments, and delivery planning.
- Strengthened engineering quality by implementing automated testing and CI/CD processes for continuous delivery.
- Contributed to technical leadership through documentation, mentoring, and knowledge sharing across global teams.

### Software engineer

Quinten | October 2019 – April 2021 | Casablanca, Morocco

- Designed and developed Pharmia, a digital healthcare analytics platform for medical prescription analysis.
- Built and maintained GraphQL APIs and backend services in Django, with React/Apollo on the front end.
- Defined the API roadmap to align with product go-to-market strategy and improve integration efficiency.
- Contributed to continuous improvement of the API development lifecycle and engineering best practices.
- Implemented unit, integration, and end-to-end testing, improving release stability.

### Full Stack developer

Prezance | March 2019 – October 2019 | Paris, France

- Contributed to the development of a collaborative presentation platform similar to Google Slides.
- Built product features using Elixir on the backend and Elm on the frontend.
- Helped deliver real-time editing capabilities and improve the overall user experience.
- Worked closely with the team to maintain code quality and support rapid product iteration.
